

Product Overview

Embarcadero Technologies, Inc. empowers application developers and data management professionals with heterogeneous award-winning tools to design, build and run software applications and database systems in the environment they choose.

Using Embarcadero tools, developers, architects, and database administrators (DBAs) can capture and share knowledge, review work, control many moving parts, and achieve superior quality – regardless of an organization's size or processes. They can seamlessly work together on a broad spectrum of internal, external, and packaged applications by leveraging our integrated and interoperable tools for any mix of heterogeneous platforms, stacks, languages, architectures, frameworks, databases, and methods. And all the while expend less effort while still gaining agility, speed, and control throughout the development process.

COMPREHENSIVE TOOLBOX

 **Embarcadero® All-Access™** is the industry's only on-demand, heterogeneous tool chest for data management professionals and application developers.

ARCHITECTURE & MODELING

 **ER/Studio® Enterprise** is a powerful modeling and enterprise architecture solution that combines process, data, application modeling, and reporting in a powerful multi-level design environment.

 **ER/Studio® Data Architect** is a data modeling tool that helps companies discover document, and re-use data assets. It gives data architects the power to easily reverse-engineer, analyze, and optimize existing databases.

 **ER/Studio® Business Architect** creates a graphical representation of a business from the core concepts that describe the business to the processes that detail how the business operates.

 **ER/Studio® Portal** is a browser-based architecture and design tool that allows organizations to share, browse, and report on the metadata contained in the ER/Studio repository for improved data and metadata management practices.

 **Embarcadero® Schema Examiner™** ensures the integrity of database schema by performing a comprehensive set of diagnostic tests that validates the schema and ensures enforcement of relational model rules.

EMBEDDED & WORKGROUP DBMSes

 **InterBase® SMP** combines a multi-generational architecture with simple installation, low administration and deployment costs, automatic crash recover, and a self-tuning engine that makes it well-suited for small enterprise, desktop, and embedded applications.

APPLICATION DEVELOPMENT

 **Embarcadero® RAD Studio** is the industry's most powerful rapid application development suite for visually building GUI-intensive, data-driven applications for both native Windows and .NET. It is a complete rapid application development solution for building native Windows®, .NET, Web, and database applications. It includes Delphi®, C++ Builder®, and Delphi Prism™.

 **Delphi®** is the premier rapid application development environment for Windows, enabling you to quickly and easily deliver powerful applications across multiple Windows and database platforms.

 **C++ Builder®** is the only true RAD C++ environment – combining a powerful ANSI C++ tool chain with a rich and extensible visual component framework for ultra-fast Windows application development.

 **Delphi Prism™** provides a cross-platform development solution and robust programming language for rapidly developing .NET, Mono, ASP.NET, and data-driven applications for Windows, Linux and Mac OS X.

 **Delphi® for PHP** makes building robust Web applications easier with visual drag-and-drop tools, powerful editor, connectivity to leading databases, and an integrated reusable component class library.

 **JBuilder®** continues to drive innovation and increase Java™ developer productivity by providing an enterprise-class, Eclipse-based integrated development environment (IDE) with support for the leading commercial and open source Java EE5 application servers.

 **3rdRail™** (Ruby on Rails IDE) is a complete, intuitive IDE that delivers the power needed to dramatically accelerate Ruby on Rails™ Web development with innovative and powerful features built from the ground up for Ruby on Rails (RoR) developers.

 **TurboRuby®** is the intuitive IDE that delivers the power needed to dramatically accelerate non-Rails Ruby Web development.

DATABASE MANAGEMENT & DEVELOPMENT

 **DBArtisan® XE** is the leading heterogeneous database administration tool that boosts DBAs productivity enabling them to maximize availability, performance, and security across all major DBMSes.

 **Rapid SQL® XE** is a leading heterogeneous SQL IDE that helps database developers produce high-quality SQL code faster by simplifying SQL scripting, query building, object management, project management, and version control.

 **Embarcadero® DB Change Manager™ XE** helps database administrators and developers simplify, automate, and report on database changes.

PERFORMANCE & OPTIMIZATION

 **Embarcadero® DB Optimizer™ XE** monitors and maximizes database and application performance by quickly discovering, diagnosing, and optimizing poor-performing SQL.

 **Embarcadero® J Optimizer™** provides Java™ developers with a comprehensive environment for optimizing application performance and managing application quality, enabling you to deliver fast, scalable, and reliable applications.
